CHRIS CLARK

SKILLS

I possess a strong skill set in front-end development, specializing in React.js and JavaScript for visually appealing and responsive websites. Proficient in back-end development using Node.js and Express.js to build robust RESTful APIs. Experienced with MongoDB and SQL databases, skilled in Git and GitHub version control. Familiarity with AWS S3 and expertise in Agile methodologies such as Scrum and Kanban. UI design principles and user-centric approach drive my work. Effective problem-solving, communication, and continuous learning enhance my capabilities as a software engineer.

EXPERIENCE

TEKSystems for Bank of America, Dallas, TX – UI Developer

NOVEMBER 2022 – MAY 2022

- Active participation in daily Agile standup meetings to discuss team progress and identify potential roadblocks.
- Observing standup meetings of a parallel team to gain a broader understanding of the project's scope and challenges.
- Engaging in "Knowledge Transfer" (KT) sessions to comprehend the architecture, functionality, and design rationale of a complex React with TypeScript codebase.
- Analyzing and debugging the codebase using Jira and Bitbucket for tracking changes and managing the codebase.
- Creating comprehensive technical documentation, managing and organizing it using SharePoint, and presenting the documentation in meetings to facilitate knowledge sharing and ensure team alignment.

Innova Technologies, Fort Worth, TX – Front End Developer

APRIL 2022 – OCTOBER 202

- Active participation in daily Agile standup meetings, discussing progress, identifying roadblocks, and setting daily goals.
- Extensive coding experience, dedicating 5-6 hours daily to front-end development tasks such as form creation, page/component building, and integration of Redux and RESTful APIs from a .Net core backend.
- Proficiency in SQL database operations, occasionally working with the database to understand the data structure and inform front-end development.
- Collaboration with peers and senior developers through code reviews, ensuring code quality and consistency.
- Utilization of GitHub Desktop and DevOps for version control and story management, contributing to efficient development processes.

Self, Dallas, TX – Freelance Web Developer

AUGUST 2021 – MARCH 2022

- Developed and honed my web development skills through self-directed projects, exploring technologies such as React.js, JavaScript, and Next.js to expand my expertise.
- Collaborated with individuals and small businesses to provide consultation and guidance on web development best practices, offering solutions tailored to their unique needs and objectives.
- Continuously stayed updated on the latest trends and advancements in web development, leveraging online resources and communities to enhance my skills and ensure high-quality deliverables.

EDUCATION

Thinkful, Dallas, TX – Full-Stack Software Engineer Bootcamp

FEBRUARY 2021 – JULY 2021, DALLAS, TX

Thinkful's Full Stack Software Engineering program provided immersive training in front-end and back-end development. I gained expertise in React.js, Node.js, and databases, mastering industry best practices and agile methodologies. Collaborative projects and code reviews honed my problem-solving and software architecture skills. With mentorship and hands-on experience, I developed strong communication and teamwork abilities. Thinkful prepared me to contribute as a skilled Software Engineer, delivering high-quality solutions in the dynamic field of software development.
