SUMMARY

Experienced Front End Developer with a strong track record in the software industry. Known for excellent collaboration and team-oriented work style, combined with a proactive approach to learning new technologies. Proficient in JavaScript, React, Redux, HTML, CSS, and Bootstrap, with a demonstrated ability to create visually appealing and functional websites. Skilled at managing CSS styles and frameworks and developing optimized, cross-platform front-end code. Proven experience in integrating RESTful APIs. Experienced working effectively within Agile environments. Eager to contribute these skills in a dynamic team setting.

SKILLS

Front-end development: JavaScript, React, Redux, HTML, CSS, Bootstrap
Back-end development: Node.js, Express.js, Knex.js, SQL
Tools and technologies: Git, Vercel, REST APIs, NPM, DevOps, Jira, TypeScript

EXPERIENCE

Software Engineer II - Bank of America, (Nov 2022 – May 2023)
- Developed high-performance, enterprise-scale web applications using React.js
- Worked in an Agile, CI/CD environment.
- Built HTTP clients in the browser with XHR and Fetch-based frameworks and integrated REST APIs.
- Managed version control and source code using Git, while also utilizing LESS/SASS for styling.
- React.js, JavaScript, TypeScript, Bitbucket, Jira, Git, NPM

Front End Developer - InnovA Technologies, (April 2022 – Nov 2022)
- Designed, built, and maintained proprietary software applications based on specific business requirements.
- Improved the performance of existing software by identifying and addressing bugs and issues.
- Developed new features that allowed customers to easily track sales goals, resulting in the acquisition of new customers.
- Collaborated with the design team to create a modern and user-friendly interface for the new feature, resulting in positive feedback from both customers and support staff.
- React.js, JavaScript, SQL, REST APIs, Bootstrap, CSS, NPM, Azure DevOps, Git, Github Desktop

Web Developer - Self-Employed, (June 2021 – April 2022)
- Designed, developed, and deployed websites and web applications using React.js and Node.js to create dynamic, interactive user interfaces.
- Utilized Git for version control to manage and collaborate on code with clients and other developers.
- Communicated with clients to understand their business needs and tailor solutions to meet their specific goals, while incorporating the latest web development best practices.
- JavaScript, HTML, CSS, Bootstrap, Material UI, React, NPM, Git, MongoDB

EDUCATION

Full Stack Software Engineering Bootcamp - Thinkful, (Feb 2021 - Jun 2021)
- Developed proficiency in front-end technologies such as HTML, CSS, and JavaScript, including frameworks like React and jQuery
- Gained experience with back-end technologies such as Node.js, Express.js, and PostgreSQL
- Learned Agile methodologies and best practices for software development
- Built a portfolio of web applications, demonstrating skills in full-stack development, API integration, and database design
